Typical Review of *Enemies Within*

I've just read Enemies Within and am ready to read it again. It seems the more I read the more I want to know. I've been following the USS Liberty for approximately 24 years and never imagined I'd be reading something as chilling and riveting as this! So realistic that I was in tears, and actually felt as if I were there, terrified and slammed into a wall. I did not want this to end. I want more. I want to read more, know more and see more in FILM! A blockbuster film! Almost forgot to mention that my partner Wayne Kyle was aboard the USS America and witnessed some of the after effects of that incident.

What Happened and Why We Should Care

On June 8th, 2019, patriotic Americans will mark the 52nd anniversary of a day of infamy for our naval forces and for our country. The harsh realities of that day will never leave the crew, and can only be assuaged by service to and victory of truth and justice.

For on that day in 1967, during the Six-Day War, the Israeli military launched a deliberate, unprovoked, full-scale attack against the defenseless American Naval intelligence ship USS Liberty—with unmarked jet fighters, followed by Israeli Navy torpedo boats and Israeli Army boarding helicopters with commandos. The US ship was steaming in international waters on a cloudless day with flags unfurled and other identifying features fully visible.

Two hours of pure hell ensued: For 25 minutes a minimum of 12 Israeli jets from all directions struck the ship with 100s of 30 mm cannon and rocket rounds, dropped napalm canisters on the Liberty's bridge, and jammed/destroyed five American emergency communications channels. Then from the PT boats six torpedoes were fired, one striking the Liberty starboard side leaving a 35-ft. diameter hole, killing dozens. The Israeli PTs machine-gunned stretcher bearers and others, as well as life rafts for survivors. Objective: annihilation of the ship and all crew.

Miraculously, heroically, Liberty survived: 34 dead, 174 wounded (of 294)... and the story of Israel's premier war crime and top US official coverup and treason began...

...and has not yet ended. For 52 years, justice for the Liberty has been delayed, hence denied. The patently absurd official story that "Israel mistook the Liberty's identity, sorry" has thwarted any investigation or prosecution of the aggressors, leaving the heroic victims hanging out to dry... BY THE COUNTRY THEY PROUDLY SERVED. The dishonor of their top brass and government has our Founders rolling in their graves.

In 2011, surviving Liberty veterans reached out to obtain the services of a sympathetic, accomplished screenwriter, Mr. Clint Burnette, to tell their story—in hope of seeing it take form with the enormous cultural impact of a feature film.

Mr. Burnette worked tirelessly with these good men over three years, interviewing in depth and great detail every aspect of the Israeli attack against the USS Liberty. He questioned them repeatedly to be absolutely certain the information was error-free. Every scene was examined by the men for, at times gutwrenching, accuracy. *ENEMIES WITHIN* is THEIR story as witnesses of the highest integrity.

TO THE HEROIC SERVICEMEN OF THE USS LIBERTY!
